

Unlocked SIM Device

Use in market carrier SIM cards while traveling abroad

Dual Network Capability

The BlackBerry 8830 offers the ability to use one device both in the U.S. and while traveling outside of North America. This phone supports both CDMA and GPRS/GSM networks

External Memory

With a microSD card, you've got the room you need for larger work files — presentation, reports, documents or fun files like ringtones and music. Purchase an optional memory card and increase memory by up to 2GB.

Full QWERTY keyboard

QWERTY keyboard makes sending emails and editing documents quick and easy.

GPS capable

Allows you to view your geographic location and works with BlackBerry maps as well as other location-based services.

Media Player

Features a media player with stereo headset jack, so you can play video and music files you've downloaded.

Phone as Modem Capable

Use the included USB cable to make your 8830 a wireless modem and extend fast network speeds to your laptop

Bluetooth® Wireless Technology

Built-in radio for technology for short-range wireless communication which allows fast, secure transmission without cables or wires.

Sprint Software Store

The BlackBerry 8830 is certified digital media powered by Handmark.

Next generation RIM Multi-Media capabilities

Roxio Media Manager with BlackBerry device Software for optimized video and music experience.

TrackBall navigation design

The TrackBall is in the center of the device for easier one handed operation

Voice Activated Dialing

Dial without touching the device.

Speakerphone

Hands free operation is made easy with built-in speakerphone.

BlackBerry Maps

View maps, get text driving directions, find local businesses.
